- Undertake project cost control.
- Write weekly project reports for submission to management.
- Prepare and submit final project accounts.
- Undertake project valuation.
- Provide advice and forecast about costs on the project.
- Undertake change management.
- Participate in tender / Bid preparation.

Quantity surveyor - construction
Saipem Contracting Nigeria Limited (SCNL) • Lagos

May 2015 - Oct 2016

- Verified the completeness of contract documents (consistency check) and distributed them to project team members.
- Tracked client, subcontractors, and vendors obligations.
- Administered the contract ensuring that project was performed in line with contractual obligations.
- Liaised with project team, coordinated Project Contract Review, participated in meetings, managed and filled all correspondence having a contractual relevance exchanged during project execution with clients, partners, subcontractors, vendors and authorities.
- Monitored contract risks of critical work packages (subcontractors, vendors) and proposing remedial actions.
- Managed the change process on the project, including change orders, claims, back charges, penalties, new prices.

- Checked consistency between records, reports and correspondence, verified supporting documentation for invoicing and ensuring that payments received are in line with the contractual terms.
- Maintaining necessary liaison with other competent Saipem functions, in particular with Financial Administration, Insurance, Procurement and Risk referents.
- Ensuring that all Project Certificates are duly issued by clients (e.g. Milestone Completion Certificates, Mechanical Completion, Handover Certificate, and Provisional Acceptance Certificate).
- Provide collection and sharing of lessons learned, feedbacks and returns of experience on issues/criticalities encountered during project execution.

Quantity surveyor-estimator

Nov 2009 - Mar 2015

Jolomi Engineering Services Limited • Warri

- Undertook activities for the procurement of materials, plants and specialized equipment from both local and foreign vendors.
- Project planning, scheduling and management.
- Prepared Bills of Quantities and other Tender documentation for competitive tendering for projects.
- Prepared and maintained up-to-date list of qualified sub-contractors/suppliers.
- Prepared and maintained up-to-date database of market prices for materials, plants, and personnel.
- Field/Onsite supervision/coordination of construction works.
- Prepared estimates, feasibility studies and budgets for projects.
- Monitored and reported on progress and costs throughout the total duration of projects.
- Prepared valuation of progress and final payments in relation to contract or subcontract.
- Assessed cost and risks when changes occurred and agreed on variation claims with sub-contractors or clients as the case demands.
- Prepared statement of final accounts, summarized the cost charges that have occurred and arriving at a final contract sum.
